

**TITLE: PANDEMIC MANAGEMENT IN INDIA - CHALLENGES IN TUBERCULOSIS
MANAGEMENT, COORDINATION, AND CONTROL**

Mr. Dalbir Singh, President, Global Coalition against Tuberculosis, will deliver a public lecture at the Canada-India Centre, On September 9, 2016.

This lecture is organized by the Forum of Federations, in partnership with the Canada-India Centre.

The aim of the lecture is to sensitize the Canada-India community, policy researchers, academics, and students, about the severity of tuberculosis cases in India, and the challenges faced in the management and control of the disease in the country.

Mr. Singh will be speaking about current efforts of the Global Coalition against Tuberculosis, the evolution of tuberculosis control in India, and the state of public healthcare in the country. He will also speak on the challenges faced in implementing tuberculosis management policies in India, and recommend possible approaches to mitigating the spread of the disease.

An open discussion segment will follow the lecture, allowing policy researchers, students, and the Canada-India community to discuss issues pertinent to India's management of tuberculosis, and possible measures to better address the policy challenges often faced.

Venue: [Canada-India Centre](#)
1401R [River Building](#), Room 1401R-J
